Panelists include: Dr. Kevin Harvey (CMO) (to be invited), Professor Ruth Macklin (bioethicist), Professor Ayontunde Bewaji (Philosopher), Dr. Carla Saenz (Philosopher & Bioethicist), Dr. Paul Brown (microbiologists), Gillian Mignott (Microbiologist and Bioethicist)

Vote of Thanks

TOPICS & OBJECTIVES FOR THE FORUM

Prof. Hari Seetharaman - 'International Dimensions of Public Health': "Strengthening primary care and public health - need of the hour in the Caribbean"

Objectives:

1. To compare and contrast the allocation of resources towards public health versus 'hospital-based' curative medicine
2. To compare the population health benefits achieved by public health versus hospital care
3. To raise the awareness of the importance of strengthening primary preventative care and public health in this era of globalization

Professor Ray Moseley - When Public Health Research Conflicts with Personal and Cultural Beliefs

Objectives

1. Identify ways in which personal and cultural beliefs can influence the ethics committee review of research.
2. Explain the pros and cons of public access to and public participation in the review of research.
3. Delineate common factual and belief arguments in the evaluation of research.

Tracia-Gay Kennedy-Dixon - under the theme: Pharmacovigilance and protection of public:'The prevalence of potential drug-drug interactions on prescription filled at the University Health Centre Pharmacy between November 2012 & February 2013."

Objectives

At the end of this presentation, participants should be able to:

1. Recognize the significance of potential drug-drug interactions (DDIs)
2. Classify potential drug interactions according to a DDI screening software
3. Identify drug class combinations that result in potential DDIs
4. List the major potential DDIs and the potential adverse events associated with prescriptions that were analyzed during the study period
5. Develop strategies to avoid or minimize potential DDIs

Professor Ralph Robinson - Bioethics and infectious diseases

1. To provide plausible reasons for the dearth of established normative principles serving the discipline of infectious disease
2. To explain the concept of the '10:90 divide'
3. To raise difficult and unique ethical questions relating to Infectious diseases

Rev. Garth Minott: The Anglican Church and the HIV and AIDS Epidemic in Jamaica."

Objectives to follow

Dr. Paul Brown: Getting to zero: Hospital Acquired Infections and Ethics

This presentation aims to

1. Give an overview of hospital acquired infections in Jamaica
2. Identify the major organisms which cause hospital acquired infections in Jamaica
3. Outline strategies for reducing hospital infections and challenges for compliance
4. Discuss whether getting to zero hospital infections is a reasonable expectation

Prof. Ruth Macklin – Globalization and the spread of new and emerging Infectious diseases: Ethical concerns and considerations in protecting public health

1. To explain globalization and its impact on the spread of diseases
2. To outline examples of infectious diseases which have caused international public health concerns
3. To discuss ethical issues that arise with globalization in relation to infectious diseases
4. To discuss the role of ethicists in public health crises of global concern
